COVER PAGE

OBC - On Board Computer

Schematic Version: *

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 1 of 23
Checked by: *	Document No: 1	Size: A3
Approved by: *	Revision: *	Date:

INDEX

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 2 of 23
Checked by: *	Document No: 2	Size: A3
Approved by: *	Revision: *	Date:

GND Power-Tree

GND-EXP Power-Tree

GND_EXP

GND-CM4 Power-Tree

GND_CM4

PSU 3.3V@3A M2 Only

PSU 3.3V@1.5A CM4

SpaceCiinTech

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 3 of 23
Checked by: *	Document No: 3	Size: A3
Approved by: *	Revision: *	Date:

Power LDO

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 4 of 23
Checked by: *	Document No: 4	Size: A3
Approved by: *	Revision: *	Date:

eMMC - Release

SDMMC Switch

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 5 of 23
Checked by: *	Document No: 5	Size: A3
Approved by: *	Revision: *	Date:

eMMC - Buffer

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 6 of 23
Checked by: *	Document No: 6	Size: A3
Approved by: *	Revision: *	Date:

RTC

External Watchdog

Manual Reset

Manual Reset

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 7 of 23
Checked by: *	Document No: 7	Size: A3
Approved by: *	Revision: *	Date:

FRAM

SPI ROM

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 8 of 23
Checked by: *	Document No: 8	Size: A3
Approved by: *	Revision: *	Date:

To EXP Connector

From Adaptor Connector

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 9 of 23
Checked by: *	Document No: 9	Size: A3
Approved by: *	Revision: *	Date:

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 10 of 23
Checked by: *	Document No: 10	Size: A3
Approved by: *	Revision: *	Date:

JTAG J-LINK

SWD ST-LINK

UART/SPI DEBUG

LED DEBUG

SCREW - EDGE

SpaceCiinTech

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 11 of 23
Checked by: *	Document No: 11	Size: A3
Approved by: *	Revision: *	Date:

HUB - SPI EEPROM

HUB - I2C EEPROM

USB HUB

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 12 of 23
Checked by: *	Document No: 12	Size: A3
Approved by: *	Revision: *	Date:

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 18 of 23
Checked by: *	Document No: 18	Size: A3
Approved by: *	Revision: *	Date:

Project:	Sub-system:	
Design by: *	Sheet title:	Sheet 19 of 23
Checked by: *	Document No: 19	Size: A3
Approved by: *	Revision: *	Date:

The CM4 supports two camera ports; CAM0 (2 lanes) and CAM1 (4 lanes).

Camera sensors supported by the official Raspberry Pi firmware are; the OmniVision OV5647, Sony IMX219 and Sony
IMX477, no security device is required on Compute Module devices to use these camera sensors.

Raspberry Pi Compute Module 4

The CM4 supports two camera ports; CAM0 (2 lanes) and CAM1 (4 lanes).

Camera sensors supported by the official Raspberry Pi firmware are; the OmniVision OV5647, Sony IMX219 and Sony
IMX477, no security device is required on Compute Module devices to use these camera sensors.

Raspberry Pi Compute Module 4

*I2C0 - Use for CAM0,DSI0,GPIO,EEPROM HAT

Sinal level refer to
GPIO_Vref (3.3V or 1.8V)

Raspberry Pi Compute Module 4

*I2C0 - Use for CAM1,DSI1,RTC
*Rpi4B using (2 lane CSI) CAM1,DSI1 and I2C0

Typically used for Camera and Displays
Internal 1.8K pull up to CM4_3.3V

Raspberry Pi Compute Module 4

CM4_3.3V
signalling,Typically
used to Shutdown the
camera to reduce power

Raspberry Pi Compute Module 4
